Khata Tracker is a **digit**

book-keeping, accounting and expense management app designed to help individuals and small businesses track financial transactions **without manual registers**. It combines traditional **khata/ledger bookkeeping** with modern digital features like invoicing, expense tracking, reports, and PDF exports.

 Key Features of *Khata Tracker*

1. Digital Ledger & Khata (Udhaar)

- Keeps track of all credit (udhār) and debit (jamā) entries.
- You can add **customers or suppliers** and log every transaction with them.
- Accurate **opening & closing balances** for each contact.

2. Personal & Business Finance in One Place

- Manage **personal income/expense** as well as **business bookkeeping**.
- Separate categories for personal and business entries.
- Monthly, weekly and yearly expense summaries.

3. Invoices & POS Billing

- Create **professional invoices** with GST/VAT/Sales Tax support.
- Built-in **Point of Sale (POS)** for on-spot billing — no extra hardware needed.

4. Inventory & Stock Management

- Add products and services, get **low stock alerts**, item-wise tracking.
- Helps you see what's selling well.

5. Reports & Accounting Insights

The app can generate a variety of reports such as:

- **Profit & Loss Statements**
- **Balance Sheet**
- **Daybook / Journal**
- **Item-wise Profit Reports**

These reports help you understand your business health and performance.

6. Team & Role Management

- You can add staff and restrict access based on roles.
- Audit logs show changes made by different users.

7. Offline Mode & Cloud Sync

- Works **offline** — syncs automatically once you're online again.
- Optional cloud backup keeps your data safe and accessible across devices.

8. Security & Notifications

- Data encryption and secure cloud storage (premium plans).
- Alerts for **payment due dates, low stock levels,** and more.
